Sequence 17, Application US/08882164D

Patent No. 6306624

GENERAL INFORMATION:

APPLICANT: Beckett, Barbara R., Jones, Glenville

TITLE PELICANT: Retinoid Metabolizing Protein

NUMBER OF ERQUENCES: 43

CORRESPONDENCES: 43

CORRESPONDENCES: Blake, Cassels & Graydon

STREET: Box 25, Commerce Court West

CITY: Toronto
                                                                                                                                                                                                                                                                                                                                                                         STATE: Ontario
COUNTRY: Canada
COMPOTER READABLE FORM:
MEDIUM TYPE: Diskette, 3 1/2 inch, 1.4 Mb storage
COMPOTER: COMPAQ, IBM PC compatible
OPERATING SYSTEM: MS-DOS 5.1
SOFTWARE: WORD PERFECT

Patent No. 6040140

APPLICANT: Croce, Carlo

APPLICANT: Croce, Carlo

APPLICANT: Croce, Carlo

TITLE OF INVENTION: Diagnostics, Therapeutics and Methods

TITLE OF INVENTION: For Detection and Treatment of Acute Leukemias

TITLE OF INVENTION: Resulting from Chromosome Abnormalities in the All-1 Region

TITLE OF SEQUENCES: 94

CORRESPONDENCES: 94

CORRESPONDENCES: Abdress: Abdress: AbdressEE: Woodcock, Washburn, Kurtz, Mackiewitz & AddressEE: One Liberty Place, 46th floor

Sequence 6011, Application US/09198452A

Sequence 6011, Application US/09198452A

Patent No. 6559294

GENERAL INFORMATION:
APPLICANT G-fiffals, R.
APPLICANTION: Chilamydia pneumoniae genomic sequence and polypeptides, fragr
TITLE OF INVENTION: thereof and uses thereof, in particular for the diagnosis, I
TITLE OF INVENTION: and treatment of infection
TITLE OF INVENTION: and treatment of infection
TITLE REPERENCE: 9710-003-999
CURRENT APPLICATION NUMBER: US/09/198,452A
CURRENT APPLICATION NUMBER: US/09/198,452A
CURRENT FILING DATE: 1998-11-24
SEQ ID NO 6031
INDICATION OF SEQ ID NOS: 6849
INDICATION OF SEQ ID NOS: 6849
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           PCT-US94-04496-86
FCT-US94-04496-86
SEQUENCE 86, Application PC/TUS9404496
GENERAL INFORMATION:
APPLICANT: Croce, Carlo
APPLICANT: Croce, Carlo
TITLE OF INVENTION: Bi
TITLE OF INVENTION: Festiting from Chromosome Abnormalities in the All-1
NUMBER OF SEQUENCES: 86
CORRESPONDENCE ADDRESS:
ADDRESSEE: Woodcock, Washburn, Kurtz, Mackiewitz & ADDRESSE: Norris
STREET: One Liberty Place, 46th floor
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                   Query Match

Sequence 3602, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Rocologen, Jim

APPLICANT: Bevco, Pam

APPLICANT: Brochcomb, Dan

APPLICANT: Brochcomb, Dan

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION NUMBER: US/09/371,772B

CURRENT APPLICATION NUMBER: US/09/371,772B

CURRENT PILING DATE: 1995-08-10

PRIOR FILING DATE: 1995-10-26

PRIOR FILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14425

SOFTHWARE: PATENTING DATE: 1936-01-08

NUMBER OF SEQ ID NOS: 14425

SOFTHWARE: PATENTING DATE: 1936-01-08
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           APPLICANT: Gave, fau.

US-08-893-204C-2/C

i Sequence 2, Application US/08893204C

i Sequence 2, Application US/08893204C

i Patent No. 6043044

GENERAL INFORMATION:
APPLICANT: Hudson, Perry B.
APPLICANT: Hakki, Said I.
APPLICANT: Hakki, A-Hamid

ITLE OF INVENTION: DIAGNOSTIC AND PROGNOSTIC MARKER

TITLE OF INVENTION: FOR METASTATIC ADEMOCARCINOMA

NUMBER OF SEQUENCES: 2
CORRESPONDENCE SEQUENCES: 3
CORRESPONDENCE ADDRESS: 3
CORRESPONDENCE ADDRESS: ADDRESSE: ROSENDENCY, Klein & Bilker

STATE: Hakki, Maryland

COUNTRY: U.S.A.
ZIP: 21043
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Length 15;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    1; Indels

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 23, Application US/09289377
Patent No. 6046321
GENERAL INFORMATION:
APPLICANT: Lex. M. COWNERT
ITILE OF INVENTION: ANTISENSE MODULATION OF G-ALPHA-II EXPRESSION
FIRE REFERENCE: RTS-0058
CURRENT APPLICATION WHERE: US/09/289,377
CURRENT FILING DATE: 1999-04-09
NUMBER OF SRQ ID NOS: 47
LENGTH: 18
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          .
